### The Patient Empathy Project What Patients Fear and Why We Have to Know

# We teach people how to treat us.

## "Service is simple. It's just not easy."

-a quote from anyone who's tried to deliver it

What if everyone has some fear that they aren't telling us about?

#### It all started with one patient...

### The Patient Empathy Project

was born.

#### Maslow's Hierarchy of Needs

Esteem (Respect for Others)

Social (Love, Affection, Belonging)

Safety & Security (Threatening Situations)

Physiological (Food, H<sub>2</sub>O, O<sub>2</sub>, Body Temp, Sleep)

#### BETHEL HOSPITAL DANISHPET OMALUR, TK.SALEM-DT.

CELL.NO-9443718839 PH.NO 04290-240155

#### **Hierarchy of Patient Needs**

Individualized Care, Respect, Courtesy

Response to Call Lights, Visiting Hours, Family Needs, Listen

Proper ID, Right Procedure, Right Meds, Reassurance, Fears/Concerns, Explain

Bed, Nutrition, Rest, Cleanliness, Temperature Control, Pain Control

#### WHEN EVERYONE'S A FALL RISK.. THEN NO ONE'S A FALL RISK.

© 2017 Sweeney Healthcare Enterprises

**1.** Have *fall risk* visual identification outside the patient room (usually a bright yellow falling star).

**2.** Non-skid socks designating *fall risk* worn by patient (usually red or yellow).

**3.** Brightly colored wrist band stating *fall risk* in bold font.

**4.** On leader rounds and at beside shift report, the nurse will ask the patient,

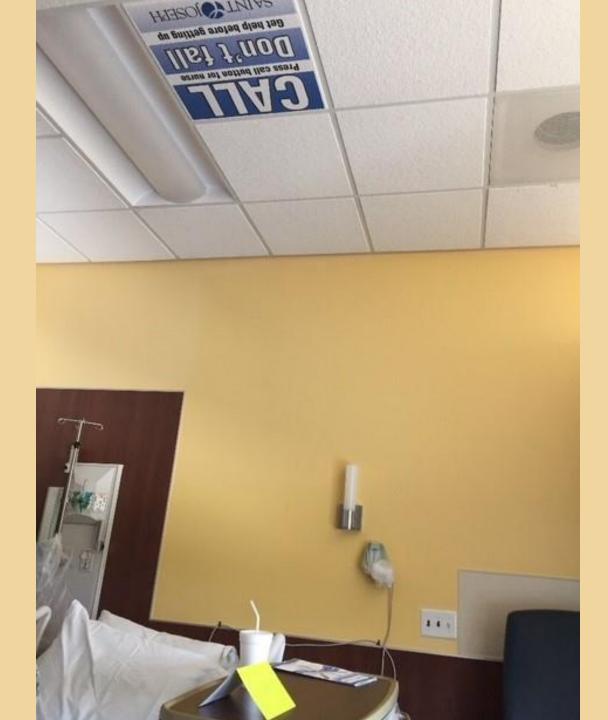

"I see you have (yellow) socks and a (yellow) wrist band. What does that mean to you?"

The patient should (if verbal and oriented) state, "I am a *fall risk*. I can't get up with out the help of a nurse or one of the team."

The nurse then asks, "show me how to call the nurse."

Then allow the patient to demonstrate use of the call light.

**5.** If the wrist band, socks or patient's understanding of their being designated a *fall risk* is not in place, make this a priority on the spot.

### Why we have to know

- 96% of all people suffer from it.
- Signs and symptoms: breathlessness, excessive sweating, nausea, dry mouth, feeling sick, heart palpitations, a fear of dying, becoming mad or losing control, full blown anxiety attack, and **the inability to think clearly.**
- It is often unspoken and shameful.
